## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to control processing in a video distribution system, classified in class 725, subclass 146.
- II. Claims 9-21, drawn to program reminder via a local operator interface, classified in class 725, subclass 58.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as control processing in service provider which creates and broadcasts an ID code for a television program. Invention II has a separate utility such as locally selecting a future television program reminder function. See MPEP § 806.05(d).
